

TECHNICAL FEATURES

- ✓ Measuring range: 350-2500 kN;
- ✓ Cell plate: with 16 strain gauge sensors;
- ✓ Wheatstone bridge: input resistance 1450 + 50 Ω;
- ✓ output resistance 1400 +/- 5 Ω;
- ✓ Nominal sensitivity: 2.0 mV/V +/- 0.15%;
- ✓ Output signal: mV/V, 4-20mA;
- ✓ Combined error (total accuracy): <+/- 0.3% F.S.;
- ✓ Repeatability: +/-0,015% F.S.
- ✓ Maximum deflection under load: 0.4 mm;
- ✓ Material: stainless steel;
- ✓ Power supply 5-15 V DC;
- ✓ Operating temperature: from -20 to +70°C;
- ✓ Insulation resistance: >5GΩ;
- ✓ Temperature coefficient of zero: +/- 0.005% F.S./°C;
- ✓ F.S. temperature coefficient: +/- 0.005% F.S./°C;
- ✓ Protection level: IP68.

The anchor load cell is a ring-shaped instrument in stainless steel.

These cells are mainly used to check the tension of strand and bar anchoring systems in medium and long term monitoring sites.

The cell is features a series of strain gauges in full Wheatstone bridge configuration providing an electrical signal proportional to the load applied.

It is provided with a cable. Please specify

the length of the required when you place your order.

The size of the cell's hole must be selected according to the load of the anchoring system and the dimension of the sensitive ring.
