The junction and measuring box is designed to centralize many instrument cables into a single measuring spot. It is cased inside a plastic box with blank front closing door. Each box can connect up to 6 instrument cables with 2, 3, 4 or 6 conductors. Measuring is quickly done by connecting the dedicated

control unit and activating the selector to obtain the information from the various channel in sequence. Each panel is provided with a multipole connector and a channel selector.

The box can be cabled with the most frequently used type of outputs:

- 4-20 mA, 2 and 3 wire
- Hz
- Ω
- mV/V, 3 and 6 wire
- V, 3 and 4 wire

DIMENSIONS AND TECHNICAL FEATURES

Box up to 3 selectors (18 instruments)	Dimension	315 x 231 x 135 mm
	Material	PVC
	Protection level	IP 55
	Closing mechanisms	with key on front blank door
	Fastening brackets	for wall mount
junction box	Material	stainless steel
	Number of slots	from 6 to 18
